Monthly Jobs Report

Revised April and May Preliminary Jobs Figures Released

INDIANAPOLIS (June 12, 2006) – The number of jobs in Indiana has risen for four consecutive months and is now 27,000 higher than this time last year, according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised April total of 2,973,000 jobs while preliminary figures for May indicate 2,975,500 jobs. The May seasonally-adjusted employment total represents an increase of 2,500 jobs from the previous month, 15,400 since January 2006 and 35,800 since December 2004.

The payroll employment statistics used in the jobs report is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.

Seasonally Adjusted Figures

The nation's seasonally adjusted figures for May show that U.S. employment growth slowed during the month, adding 75,000 jobs in comparison to 126,000 in April. Education and health services and financial activists added jobs while manufacturing and information lost workers. Construction employment stalled, most likely because of a weaker housing market.

Meanwhile, Indiana remains approximately 38,400 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana, according to April revised data, was 2,973,000, whereas May preliminary figures were 2,975,500.

In the seasonally-adjusted employment levels, manufacturing and financial activities contributed 1,500 each to the monthly gain while government employment declined by 1,900 positions. Of the jobs gained since January, 3,700 were in trade, transportation and utilities and 3,100 were in leisure and hospitality.

Non-Seasonally Adjusted Figures

Indiana's May preliminary non-seasonally adjusted payroll estimates indicate 3,000,300 jobs for the state, while April's revised total reported 2,981,200 jobs. Employment growth was somewhat less than the ten-year trend. State government education declined significantly as the spring semester at state schools ended earlier than usual.

Non-Seasonally Adjusted Metropolitan Statistical Areas

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for April, with last month's and last year's job numbers:

MSA	May 06	Apr 06	May 05
Anderson	45,500	44,700	45,000
Bloomington	79,100	82,800	78,500
Columbus	43,500	43,200	43,200
Elkhart-Goshen	131,100	129,700	130,400
Evansville	181,400	180,400	180,000
Fort Wayne	218,500	216,700	214,800
Gary	281,700	280,200	278,900
Indianapolis	897,900	889,200	893,800
Kokomo	47,600	47,100	48,700
Lafayette	93,800	94,400	92,400
Michigan City	48,300	47,800	47,700
Muncie	53,000	53,000	54,200
South Bend	148,000	148,000	146,000
Terre Haute	75,200	74,600	74,400

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For the most accurate analysis, please use revised data sets and not preliminary estimates.

-30-

Note to media: There have been inquiries regarding the difference between jobs and employment releases provided by the Department of Workforce Development. The following definitions outline the differences between these two statistical measurements.

Jobs (release date: June 12, 2006)

Job statistics are provided by the U.S. Bureau of Labor Statistics, derived from a survey of payroll records. As a payroll survey, it is based on an individual's place of work and includes industrial classifications. It includes non-farm wage and salary reports, but does not include self-employed, business owners and farm workers.

Employment (release date: May 25, 2006)

Employment statistics are provided by the U.S. Bureau of Labor Statistics, derived from a household survey. As a household survey, it distinguishes whether an individual (counted once) is employed or unemployed, even if that individual has more than one job. The unemployment rate is calculated from these same statistics.
